## Creating a new repository -

Pushing the code files into the repositories -

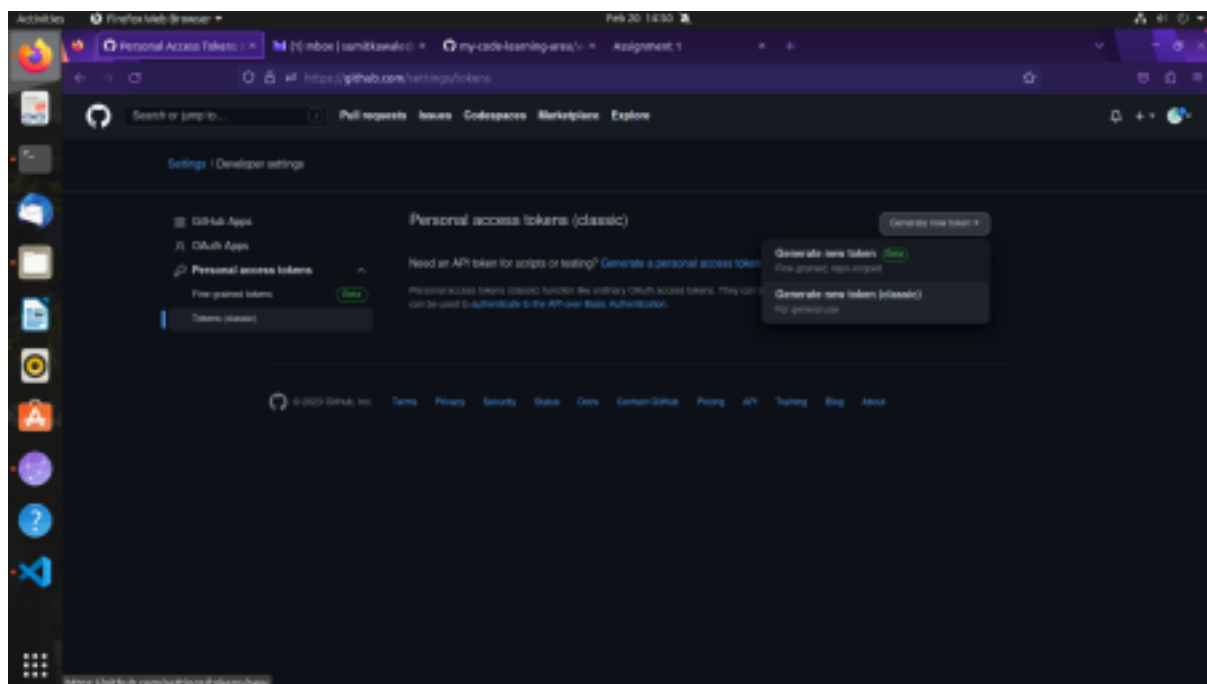

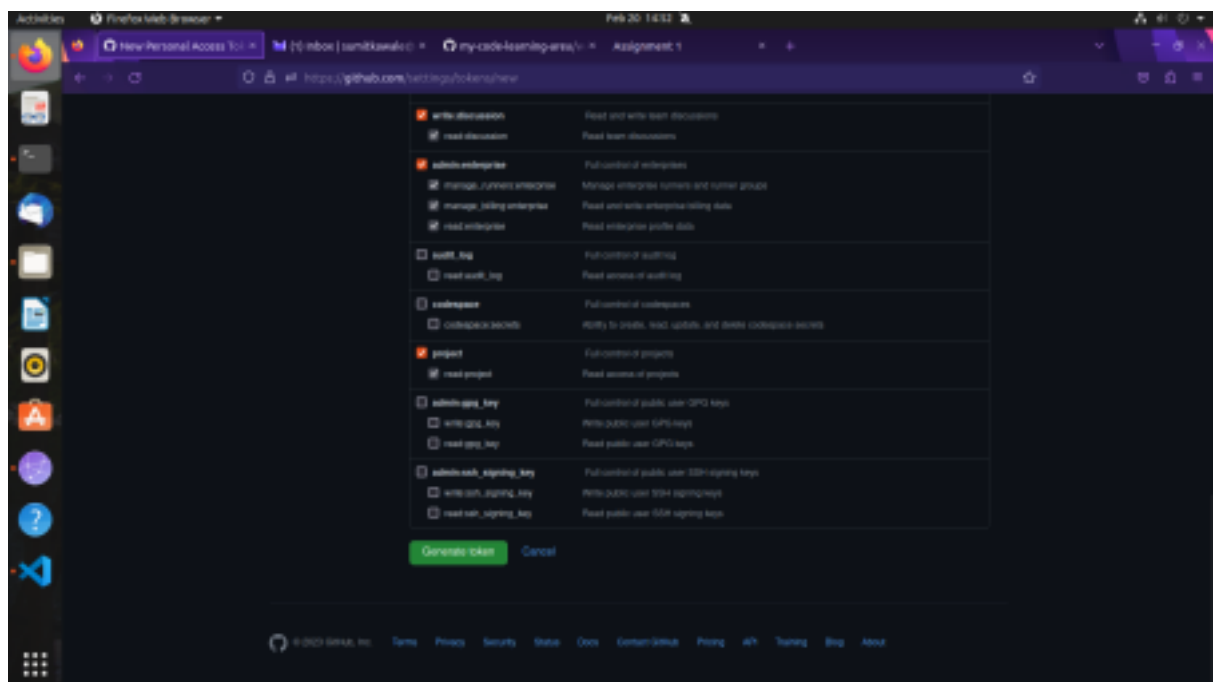

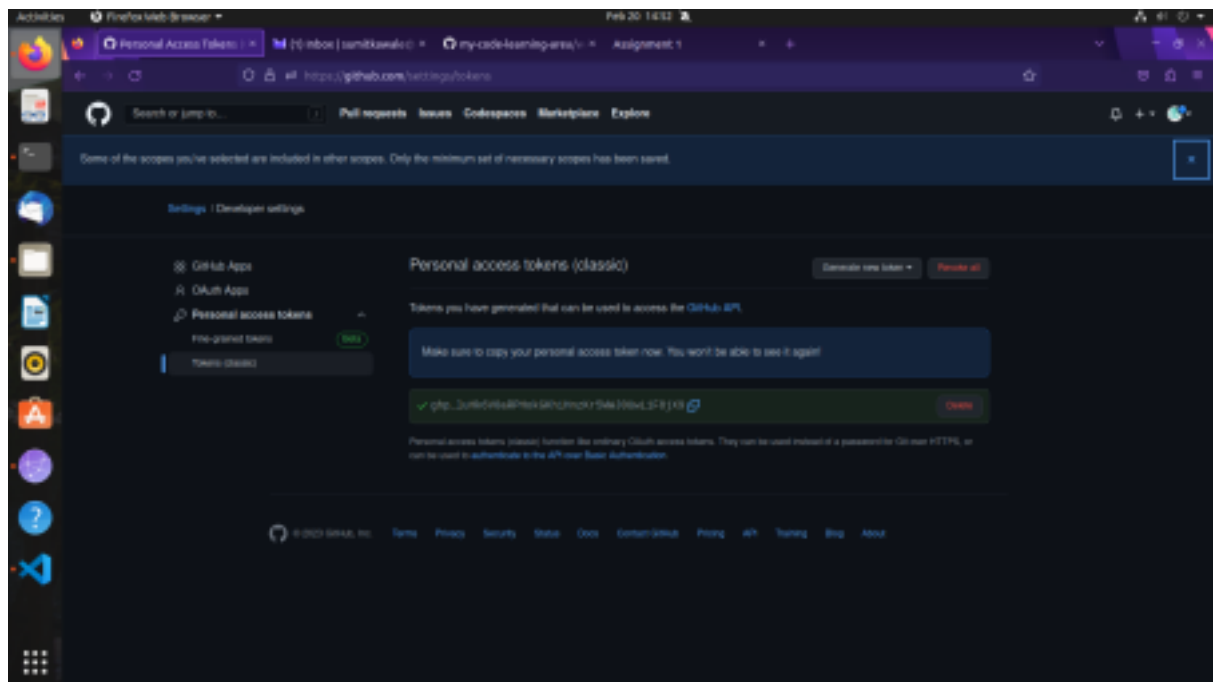

The screenshot shows a Visual Studio Code editor with a file named `index.html` open. The file contains Bootstrap CSS and a terminal window running the following commands:

```
git config --global user.email "you@example.com"
git config --global user.name "your name"
to set your account's default identity.
git --global to set the identity only to this repository.
